

# North Whins Proposal C - Hidden Valley

John Wragg

April 2019

## Summary Proposal

Designate land within the North West of the Magic Triangle for the exclusive use of Nature Beings. This land is known as the Hidden Valley, and has boundaries:

- The path from the Cullerne small gate towards WWins to the South.
- New fences to the West and East and
- The High Dune Ridge to the North.

New fences would be designed to reinforce joint "ownership" of the land by the nature beings and ourselves. This could be put in practice using a mixed species Circle and Attunement.

## Objectives

- To support the Nature Beings in their work of mutual benefit with ourselves.
- To honour our obligations as co-inhabitants of this planet.
- To demonstrate our commitment to a co-creative future.

## Method

Re-architect all the land to the West side of the Magic Triangle to incorporate

- The newly designated Hidden Valley
- The three sycamore trees
- An area previously designated for community facility
- Several houses.

This is beyond my architectural skill but it seems to me that it should be possible to fit everything in and still save a few houses if the area is planned as a whole.

There is still flexibility as to the proposed South and East boundaries of the Hidden Valley. The whole area forms a natural amphitheatre. It is called the Hidden Valley because it was until recently hard to see into or access.

There is reason to believe that it is still used as a "parliament" and training school by the Nature Beings. Just like us.
